### INTRODUCTION

The Australian Bureau of Statistics is the official statistical organisation for the Commonwealth and State Governments. Its main function is to provide government and the community with an efficient, user-oriented national statistical service.

### How to use this catalogue

This catalogue refers to products which ABS Canberra and State Offices have issued since 1 January 1984, or expect to release during 1989. The catalogue is divided into three parts.

# Part 1 describes special products and services

Part 2 lists all standard products in numerical order except that within each two-digit subject group the Central Office (Canberra) entries precede the State Office entries (see description of numbering system below). Most publications issued by Central Office contain particulars for States and Territories as components of Australian totals.

Part 3 contains various indexes, including a titles index, indexes by medium of release for non-printed products, and a detailed subject index of all current publications in alphabetical order. If you are interested in a particular subject area, e.g. foreign trade, employment, etc., you may find it convenient to identify the range of publications from the list of subject groupings in the contents pages and by this means gain access to all publications within that subject. If, on the other hand, you have a specific interest, e.g. the production of butter and cheese, industrial disputes, etc., it may be convenient to first check the detailed subject index beginning on page 269.

# The ABS catalogue numbering system

The system consists of a five digit code (e.g. 4101.0).

The first two digits define the subject by nine broad areas (e.g. 4 represents social statistics), each of which is divided into a number of more precise subdivisions (e.g. 43 is health).

The third and fourth digits are the permanent serial numbers allocated to publications within categories formed by the first two digits. An allotted number will remain unchanged provided the contents of a publication remain essentially the same.

The fifth digit, after the full stop, represents the State or Territory covered by the statistics. In general this will coincide with the ABS office issuing the publication.

The codes for each State and Territory are:

0 Australia
1 New South Wales
2 Victoria
3 Queensland

Western Australia
 Tasmania

Northern Territory
 Australian Capital Territory

South Australia

#### SUBJECT INDEX

This index is designed to assist in determining which ABS publications are relevant to various subjects of specific user interest.

Subject headings are followed by the catalogue number. The relevant page numbers to refer to in this catalogue are also shown (in parentheses).

Areas covered by the statistics are represented by the last digit of the catalogue number. The digits are as follows:

- 0 Australia
- 1 New South Wales
- 2 Victoria
- 3 Queensland
- 4 South Australia
- Western AustraliaTasmania
- 7 Northern Territory
- 8 Australian Capital Territory

No references are given in this index for Australian and State Year Books (1300.0 – 1301.6) or Pocket Year Books (1302.0–1302.6) as each of these publications contains a detailed index. The Year Books should be regarded as the principal general statistical reference works produced by the ABS.

The index is not intended as a comprehensive index of commodities or items covered in the statistics. Particular items of production and overseas trade are largely omitted. Users should, for example, consult the publication 8303.0 Manufacturing Commodities, Principal Articles Produced, Australia which contains a detailed alphabetical index of commodities produced in Australia.

Note: The last digit of each catalogue no, represents the area covered by the statistics. The page no, on which the reference appears is shown in brackets. Aus = 0, NSW = 1, Vic = 2, Qld = 3, SA = 4, WA = 5, Tas = 6, NT = 7, ACT = 8
